

# Aegon Retirement Readiness Index (ARRI) 2017

Retirement readiness increased slightly in 2017, but is still LOW

Global ARRI score 5.9

## Global score by year

Note: The first ARRI, calculated in 2012, was based on research conducted in nine countries. A separate survey in Japan was conducted and reported on later that year. Therefore, 2012 is regarded as a 10-country year. In 2013, two new countries (Canada and China) were added bringing the universe to 12. In 2014, a further three countries (Brazil, India and Turkey) were added increasing the universe to 15. In 2015, the overall size of the survey was maintained at 15 countries although with the introduction of Australia and removal of Sweden. In 2017, the countries surveyed remained the same as 2016.
